DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 9, 10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In re claim 9, the phrase "and/or" is unclear, indefinite.

In re claim 10: the following phrase suggests that a combination claim was intended to be claimed in claim 1: "said processing device is a chopper drum." It is noted that functional recitation ("can be ...," "designed ... to," "for" performing a function) must be expressed as a "means" for performing the specified function in order to be given patentable weight. A functional recitation does not differentiate the claimed apparatus from a prior art apparatus satisfying the claimed structural limitations.

All of the claims are replete with functional language.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Paquet et al (5488817).

Rauch discloses:

In re claim 1:

A harvesting machine (ref 1) with a supply device (hydrostatic, hydraulic pump system, col. 5, ln 45-51);

A control (electric valve; col. 5, ln 19-34);

In re claims 4-5:

hydrostatic, hydraulic pump system & transmission, col. 5, ln 45-51;

In re claim 6-10:

Engine & speed sensor (ref 58);

Rotational speed sensor, a chopper drum, draw in rollers (fig 9; col. 11, ln 3-8; col. 2, ln 40-50; col. 3, ln 12-18).
